Profile

Professional Summary

Computer Science student at Bahir Dar University with a strong foundation in full-stack development. Passionate about building clean, user-friendly applications and eager to gain practical experience through Team collaboration. Interested in AI and continuously improving technical skills through real-world projects..

2024-2027

Education

Bachelor of Degree— Computer Science

Bahir Dar University, Bahir Dar, Ethiopia

Studying core computer science fundamentals including data structures, algorithms, software engineering, databases, and artificial intelligence. Actively applying knowledge through personal and academic projects

Project

Ethiopian Tourist Destination

Provides users with an interactive way to explore Ethiopia's most popular tourist destinations. Users can browse through a collection of locations, view detailed information about each place, and explore images that highlight their unique features.

Includes organized listings that make it easy to navigate and discover destinations. Each location presents key details such as descriptions and highlights, helping users better understand and plan their visits.

Offers a smooth and responsive experience across different devices, allowing users to access content easily and move between sections without difficulty.
